3DEXPERIENCE-SAP Integration

Scalable platform integration between SAP S/4HANA and
3DEXPERIENCE by Dassault Systèmes

cenit

THE PROJECT AT A GLANCE

THE CHALLENGE

- V-ZUG has been using **3DEXPERIENCE®** with CATIA V6 for several years. The **3DEXPERIENCE** platform was coupled with the existing ERP system by means of a proprietary development. In the course of the SAP S/4HANA® introduction the ERP integration had to be rebuilt.
- Clocking of the **3DEXPERIENCE-SAP** integration implementation in the tight time window of the SAP S/4 HANA project
- Open integration architecture to support future ERP/PLM optimizations.

THE SOLUTION

CENIT **3DEXPERIENCE®-SAP** Integration

- Phase 1: Focus on restoring the existing processes for the basic supply of the ERP system.
Fast implementation: From the kick-off at the customer to the final go-live, only 4 months passed.
- Phase 2: Expansion of the solution for process-controlled integration of the **3DEXPERIENCE** and SAP platforms.

THE BENEFITS

- **Efficient, secure supply** of the ERP system with relevant master data from **3DEXPERIENCE®**.
- **High user acceptance** due to step-by-step introduction and the fast start into the transition with trial phases of the users.
- **Investment protection through updatability and expandability** of the solution for further development to an integrative and process-oriented PLM environment.

WHY CENIT?

- High functionality of the integration solution
- Comprehensive technical expertise as the world's largest Dassault Systèmes® VAR and long-standing SAP® Platinum Partner
- Strong understanding of processes and technology
- Simple, attractive licensing and investment model
