

# PRODUCT DATA SHEET

## ECTR5++

### THE PRODUCTS

ECTR5++ is based on the SAP price list product „SAP ECTR Integration to CATIA V5“ and enables the designer to work even more effectively in the environment of large assemblies.

### THE SCOPE OF SERVICES

The scope of services of ECTR5++ includes all services of the price list product „SAP ECTR Integration to CATIA V5“ and extends it by the more performant handling of large assemblies. This means faster response times when communicating with the SAP system. Also the design engineer has to interrupt his work less often, because tasks can be executed in the background. As a further highlight, all functions are available directly in CATIA V5: As CATIA toolbar and menu entry.

### THE FEATURES

- Calling of all functions via a CATIA toolbar or a separate menu directly in the CATIA user interface
- Automatic adaptation of the integration language to the user interface language of CATIA V5
- High-performance acquisition of the CATIA tree structure
- Accelerated reading and writing of CATIA parameters, properties and document information during mapping
- Direct access to the link types used within CATIA (Instance, CCP, View)
- The cloning of structures takes place in the background, the designer does not have to interrupt his work for this
- Direct display of the instance in CATIA when called from the SAP ECTR application structure, even if the CATIA tree structure is collapsed
- Several instances of CATIA can be used simultaneously. This only requires a separate SAP ECTR instance

### AREAS OF APPLICATION

The ECTR5++ is primarily intended for customers who have to handle large assemblies and for whom the integration window of the price list product is not integrated enough. Users are CATIA V5 designers.

### SYSTEM REQUIREMENTS

SAP Engineering Control Center integration with CATIA V5 is required. Its system requirements can be found in the corresponding product data sheet on our website.

ECTR5++ requires the customer to provide a Dassault Systèmes development environment.

## LICENSES

Item number	Item description
CSN-CID-08-V5-ECTR/A	Addon to SAP ECTR to CATIA V5
CSN-CID-08-V5-ECTR++	Addon to SAP ECTR to CATIA V5
CSN-CID-09-V5-ECTRA+	Extended Maintenance for ECTR5++

## FURTHER INFORMATION

Due to constant improvements and error corrections, especially in the SAP ECTR, a special SAP Note was set up. This is available in addition to the installation information for the SAP ECTR (<https://help.sap.com/viewer/index>).

In [this](#) note you will find current information about the system requirements of the SAP Engineering Control Center for CATIA V5.
