PRODUCT DATA SHEET

REQUIREMENTS VALUATION COCKPIT

THE PRODUCT

The Requirements Valuation Cockpit (RVC) by CENIT helps to shorten the time to quote in request for information, proposal or quote (RFx) processes. It provides a central interface for managing and processing customer requirements to offer a high-quality solution for the customer in the shortest possible time.

PRODUCT SCOPE

RVC is based on the requirements management capability of SAP Enterprise Product Development (SAP EPD) and helps companies evaluate customer specifications as part of RFx processes. It provides a central interface for stakeholders to evaluate customer requirements, costs and feasibility. RVC enables companies to make informed decisions and prioritize the requirements that are most important to the business. By using RVC, companies ensure that tender processes are handled efficiently and effectively, and that projects are delivered with high quality and on time.

THE FEATURES

COCKPIT

- The Cockpit is the central entry point and helps users to keep an eye on the deadline by showing the degree of completion and fulfillment of each customer request.
- It uses filter and search functionality to be individually adapted to the needs of the users.

CREATOR

- The Creator provides a wizard for the setup of a new customer request allowing to enter the essential facts of the project such as customer, counterpart and the due date.
- It stores the new project automatically as a requirement model in a customer specific folder in the underlying requirements management capability of SAP EPD.

DECOMPOSER

- The Creator provides a wizard for the setup of a new customer request allowing to enter the essential facts of the project such as customer, counterpart and the due date.
- It stores the new project automatically as a requirement model in a customer specific folder in the underlying requirements management capability of SAP EPD.

REQUIREMENTS VALUATION COCKPIT

COLLABORATION HANDLER

- The Collaboration Handler supports in the collaboration with suppliers, the customer and colleagues of other departments.
- To collaborate with a supplier or customer, the Collaboration Handler creates the collaboration, adds the selected requirements and assigns either the users of the supplier or the counterpart of the customer.
- After that, the assigned users are informed by email. Colleagues of internal departments are invited by email as well to directly access their requirements via the Cockpit.

EVALUATOR

- The Evaluator enables colleagues of different departments, users of suppliers or the counterpart of the customer to focus on assigned requirements and directly evaluate those requirements by providing a separate evaluation view.

TECHNICAL INFORMATION

RVC is offered as Software as a Service (SaaS) on SAP BTP.

SYSTEM REQUIREMENTS

The components listed below are required to use RVC.

- SAP Business Technology Platform (BTP)
